Profile Summary

Dynamic Full-Stack Developer with comprehensive expertise in MERN and Python full stacks. Strongly skilled in Data Structures & Algorithms (DSA) using C++, with a proven ability to solve complex computational problems efficiently. Eager to contribute analytical problem-solving and modern full-stack expertise to high-impact software engineering roles within fast-paced, large-scale environments

Education

Gayatri Vidya Parishad College of Engineering (GVPCE) <i>B.Tech in Computer Science and Engineering (CGPA: 8.8 / 10.0)</i>	2024 – Present Visakhapatnam, Andhra Pradesh
Sai Ganapathi Polytechnic College <i>Diploma in Computer Engineering (97.45%)</i>	2021 – 2024 Visakhapatnam, India

Technical Skills

Programming Languages: C, C++, Python, SQL, JavaScript (ES6+), HTML/CSS
Backend Technologies: Node.js, Express.js, Django, REST APIs
Frontend Technologies: React.js, Tailwind CSS
Databases & Caching: MySQL, PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, Postman, VS Code, AWS
Core Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks
AI Familiarity: Prompt Engineering, GenAI Tools, LLM-assisted Workflows

Projects

- AI Mock Interview Platform | MERN Stack, Firebase, OpenRouter, Socket.IO, Redis**
- Developed an **AI-powered mock interview platform** supporting **Technical, HR, Behavioral** and **Resume-Based** interviews with **personalized question generation** using **OpenRouter AI** and **resume analysis**.
 - Implemented **real-time AI chat**, **voice-enabled interview interactions** and **1:1 communication** using **Socket.IO WebSockets** along with **automated feedback generation** and **performance analytics**.
 - Integrated **Firebase Authentication**, **MongoDB**, **Redis caching**, **PDF resume parsing**, **Email/SMS notifications**, and **Razorpay payment gateway**.
- Secure Multi-Campus Network Design | Cisco Packet Tracer**
- Designed and simulated a secure multi-campus enterprise network supporting **30,000+** users using **VLANs**, **OSPF**, **HSRP**, **Cisco ASA Firewalls**, and **Site-to-Site IPsec VPNs**.
 - Configured **DMZ servers (Web, DNS, Email, FTP)** behind **Cisco ASA Firewalls** to securely provide public-facing services while isolating the internal network
 - Implemented **Inter-VLAN Routing**, **EtherChannel**, **WLC-managed WLAN** and centralized **DHCP/DNS** services for efficient network operations.
 - Applied network security best practices, including **firewall ACLs**, **port security**, **VPN encryption**, **network segmentation**, **redundancy** and **failover mechanisms**.

Experience

Millennium Software Solutions <i>Industrial Trainee – Python Development</i>	Jan 2024 – May 2024 Visakhapatnam, India
- Built and maintained web application features using Django, following MVT architecture and RESTful development practices. - Analyzed logs and debugged issues, improving application stability by 25%. - Utilized Pandas and NumPy for data cleaning, transformation, and analysis, improving data processing efficiency.	

Certifications

MERN full Stack Development	Verify Credential
CCNA Certificates	Verify Credential

Achievements

- Secured 97.45% achieving the highest cumulative academic score in the diploma batch
- Qualified for the Second Round of Smart India Hackathon (SIH) 2025 among numerous competing teams.
- Solved 1000+ Data Structures and Algorithms problems across coding platforms, improving problem-solving efficiency.
- Achieved 45th Rank in AP ECET among thousands of candidates.
- Contributed to the development of a College Website used by 1,000+ students, improving usability and accessibility.
